

Recommended points • Features

Delivers the appearance of tile or brick, that a carpenter can install (No plastering required)

Installation can be accomplished simply with adhesive and pin nails as per manufacture instructions.

Superior soundproofing material. One layer Gravio delivers an STC of 56, two layers 59.

You can easily cut out even complicated fits with a hand saw.

The weight is roughly 66% lighter than sheet rock and 40% lighter than standard wall tile.

Compared to general combustible materials, the weight has been reduced to achieve increasing in size.

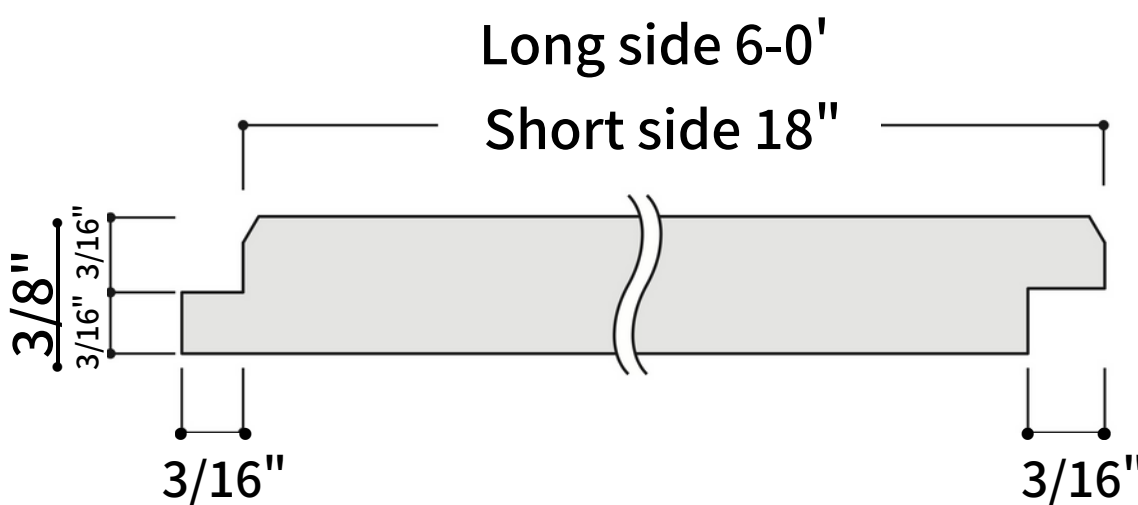

Larger product size than ordinary tiles and stones. (3/8" x 18" x 6'-0")

Obtained combustible material certification
Class A Fireproof (ASTM E84 tested), made from "Dallite" composed of mineral fibers and volcanic vitreous deposits.

Body Specification

- Size: 3/8"x18"x6'-0", 2pcs/carton (17.76sqft), 33lbs/carton
- Packing: Carton box
- Base material: Volcanic silicates fiber-reinforced multi-layer board
- Surface: Deep carving style embossing and special multicolor coating finish
- Edge Processing: Halving lap joint in all sides

GRAVIO embossed type

3 Reasons Why GRAVIO embossed type is Selected

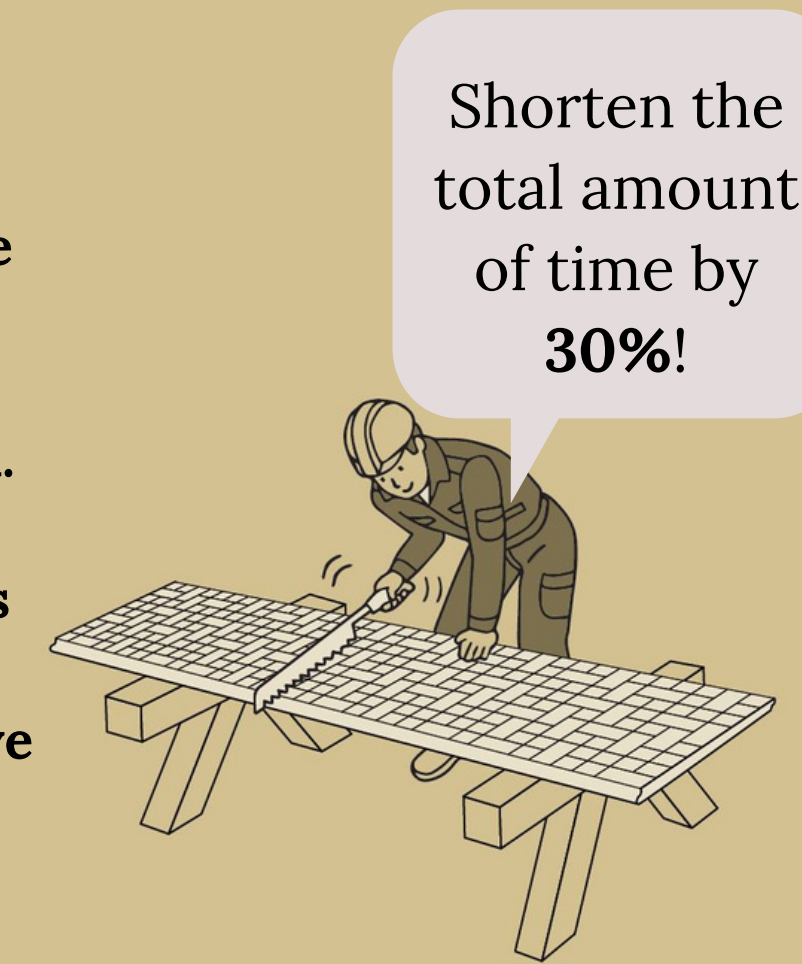

A step up in Luxury!

Although residential housing tends to contain familiar building materials, you can easily upgrade the aesthetics in your house by installing GRAVIO embossed type panels in any part of the home.

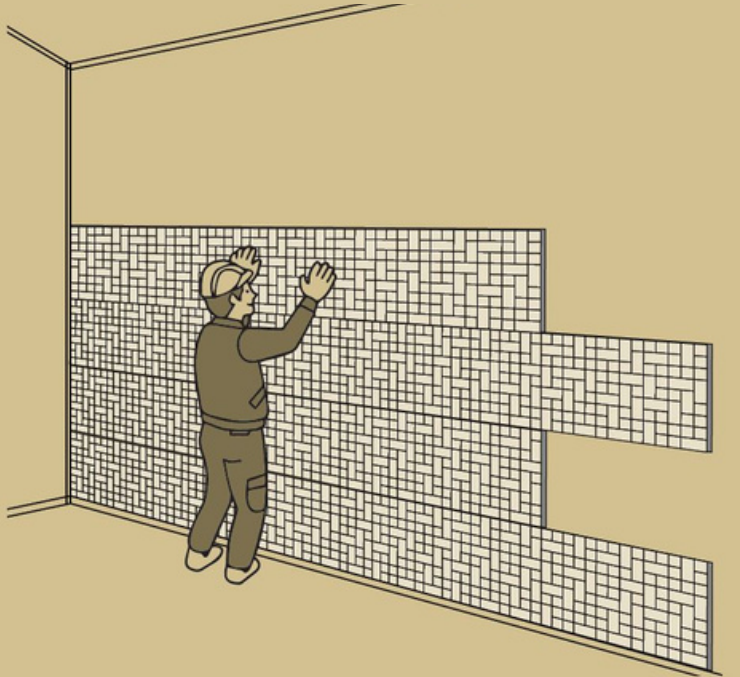

Faster Installation Than Tiles!

GRAVIO embossed type panels are made from non-combustible volcanic ash and are extremely lightweight and easy to work with. The large panel sizes and ease of cutting, shorten installation times by 30%. Installation can be accomplished simply with adhesive and pin nails as per manufacturer instructions.

Reduced noise transmission between walls

Due to the trapped air inside Gravio, its sound transmission absorption is superior. Testing has shown that one layer of Gravio over drywall gives an STC of 56 (equivalent of double drywall), and when applied to both sides the STC is 59.

You can upgrade the atmosphere of home entrances, bedrooms, living/dining rooms and kitchens, by changing the expression of the walls using GRAVIO embossed type. There are 33 color/texture options to choose from!

An Elegant and Natural Modern Space

Large pieces of beautiful stone patterns create a perfect combination of modern and Japanese tastes. Ceiling patterns compliment the contrasting geometries, resulting in a visually pleasant welcome for all visitors.

Traditional and Chic Modern Style Entrance

This entrance exudes both gorgeousness and elegance. The wall contains brick patterns that come with a sense of rugged stony texture. The use of backlighting or in this example sconce lighting really sets off the 3-dimensional patterns and adds depth of shadow.

Natural Living Room With Warmth

Here, the use of GRAVIO embossed type in the living area creates an atmosphere like a lounge by dimming indirect lighting. The selection of light colors, warm wood tones and the soft lighting approach on this particular texture add an appeal of classiness and peaceful calm.
